TBD | Temporary Peace

Note for writers: This page is to explore the temporary peace prior to the Seven Hour War arriving, and go over some of the signs the Combine was probing the planet prior to their arrival.

TBD | The end of Humanities Soverignity

Note for writers: This page is to go over the Seven Hour War itself, describing the war between Humanity and the Combine- the devastation it left behind and the overall outcome of the war and humans.

TBD | Aftermath: The Occupation and various Organisations

Note for Writers: This goes over the history of what happens after the war, the various organizations formed and naturally what the STILL existing organizations like the UN are still doing during this time period.

And yes, to avoid Writer confusion incase any writer doing this page forgets- the UN is still around up to around the 2010s. And to be extra clear- Breen is not the Earth Administrator per WN lore until 2014.
